Sheath

What is ROG Sheath?

The extra-large ASUS ROG Sheath mouse pad is optimized for all gaming mouse types, with a smooth surface that gives you pixel-precise tracking for unmatched command and control. ROG Sheath is designed for your comfort and features a non-slip ROG-red rubber base that keeps it in place and stitched edges that resist fraying to prolong its lifespan.

Rubber Base in ROG Red

Go BIG or Go Home

ROG Sheath is massive, measuring 900 x 440 x 3mm. It is intended to withstand a variety of gaming setups. There's more than enough room for all your gear including your laptop, keyboard, and mouse.

Design Optimization

ROG Sheath allows you to always stay in control, even when you're involved in an intense firefight. Durable stitching along the edges prevents fraying, even after years of service.

ROG Sheath has an intricately-woven surface that's perfectly designed to ensure a smooth glide for your gaming mouse.

It's been subjected to a barrage of stress tests, including a mouse glide distance of more than 250km, and exposure to temperature extremes of -30°C and 60°C for 57 hours. ROG Sheath is as tough as it gets.
