- Flightcase
- Microphone
- USB cable
- Pop filters
- Shock mount
- Desk stand
- User guide

System requirements

- PC or laptop with USB port
- Windows 7, 8, 10

GXT 252 Emita

Are you a vlogger, singer, gamer or do you just love to Skype or chat with your friends all day? Then you need a great microphone! With the Trust Emita USB Studio Microphone you can easily record and connect to reach the rest of the world.

Warm, rich and clear audio

When you are creating a podcast, music recording or vlog you need professional results. With the Emita USB studio mic you will be able to sing, rap or record acoustic instruments while ensuring clear and warm sound. The cardioid recording pattern picks up most sounds from the front of the microphone, while ambient noises are hardly noticeable. This allows you to record very focused; exactly the way you want it.

Shockingly stable

Thanks to the heavy weight metal stand and the high-end shock mount, the microphone stands stable on any surface. The mount prevents vibration traveling up the microphone stand, so you can keep recording even when you hit your desk by accident; small shocks will be absorbed.

Double-screen pop filter & foam cap

Do you hate spending time editing your recordings, to minimize the plosives (like P's and B's) or hissing noises? With the included double-screen pop filter, you will have improved speech quality. Making sure that everyone will hear you clearly, without the need for excessive editing. The foam cap removes blowing sounds, perfect when doing an interview at a windy location.

Mobile recording

Thanks to the durable aluminium flight case, you can make your recording studio mobile. Take your microphone with you when travelling, the case will ensure safe storage during transport. The Emita USB studio mic features a digital USB connection, making it ideal to work on any PC and laptop. Just plug it in and start recording; no installation or driver is needed.
